DATED 2 7 24

2nd 1877

[Despatch Abstract.]

C.E. file
10.40 A W.S. 1924 Cat.
23.9.24

Copy of letter No. 1379 dated 20-2-24 from F.C.L. Clift Esq Executive Engineer, Bellary Division to the Superintendent, Allipuram Jail. Bellary.

I enclose plans and estimates for "supplying water to the Allipuram Jail from Allipuram tank" and --- request that after perusal you will send them on to the Chief Engineer for sanction. I have had no time to --- prepare copies of plans and estimates to send you and in any case it is essential that the scheme as now proposed be sanctioned by competent authority and it will not be possible for you to go ahead with the work until such sanction is obtained.

2. I have not made any allowance for connecting up the well in which the boring operations are being conducted below the tank with the system, as I am not sure that you will get sufficient water by this means, but if supplies become available ffom artesian sources. it will be possible to connect up a few spare pipes to the nearest well.

Sir,

In continuation of the correspondence ending with Memorandum No. 197 Wks/A/24 C.P. dated the 24th January 1924, I have the honour to forward herewith a copy of letter No. 432/J, dated the 19th February 1924, from the Superintendent, Alipuram Jail, and to request that early orders may be passed thereon.

2. It is advisable for the Superintendent to follow the scheme proposed by the Executive Engineer and to effect such savings as he can on the P.W.D.Estimate. Most probably the savings will come to about Rs.20,000/-

Rs.20,000/-

I have the honour to be,
Sir,
Your most obedient servant,

Lieut-Col., I.M.S.
Inspector-General of Prisons

Copy of letter No. J/432, dated the 19th February 1924, from D. A. Greenwood Esquire, Superintendent, Alipuram Jail, Bellary Cantonment.

I have the honour to inform you that the rough estimate sent to you for the water supply scheme to this Jail was forwarded by the Chief Engineer to the Executive Engineer, Bellary, for elaboration and submission of detailed estimates.

The Executive Engineer has drawn up plans and estimates for a much more elaborate scheme than that submitted by me, although the main principles are the same.

He allows for:- 3 Filter Beds sand.
1 Engine House.
2 Overhead tanks.

The main difference is that when I was pumping direct from the tank to the Jewel filters, his scheme provides for gravity flow through sand filters and then pumping from a sumph.

His scheme is complete and comprehensive and much sounder than my original rough proposals.

His estimate works out at Rs.1,14,000 while my original estimate was for Rs. 86,000/- I expect to save about 10,000 on his estimate by using convict labour.

May I be given early and precise instructions as to what I am to do. I am carrying on with the pipe line and over head tanks, but the whole work should be carried on simultaneously.

SIR,

In continuation of the Pipe Laying Report forwarded under this office No.447/J dated the 21st February, 1924, I have the honour to forward herewith detailed plans and estimates of the water scheme for this jail as prepared by the D. P. W.

The main differences between this and the original scheme are

(a). The provision of sand filters

(b). The provision of a roof to the overhead tank

(c). A much larger, better, engine house than that contemplated by me.

May I please be forwarded with very early instructions as to whether I am to go on with the scheme as now designed, or whether I am to stick to the original scheme.

I am doing the preparatory digging which costs nothing, but before collecting material I require sanction for the work.

Caulking tools etc. have arrived and the pipe is being laid.

I have the honour to be,

Sir,

Your most obedient servant,

D. Greenwood

ENGINEER AND SECY TO GOVT. P.W.D.
Section.
17MAR1924
C. No. 6446
MADRAS

I have the honour to report that J. S. WILSDALE Esq., Sanitary Engineer to Government, inspected the water scheme now under construction and suggested the following improvements.

1. The under layers of the filter beds are 3' thick, this is unnecessary, and should be reduced to 1 foot.

2. The water level of the filter beds is shown as +110 and the lowest workable level of the tank is +107'. The of 3' may be reduced by

The above 2 recommendations will have the effect of reducing the price of the filter beds.

3. The pumping sumph is at present designed inside the engine house. This is unsound and it should be placed outside, should be made round, and should be of greater superficial but not so deep.

This will not alter the estimates in any way.

4. The present scheme only contemplates working the filter beds while the pumps are working. This principle is entirely wrong as unless the filters are worked continuously, they are entirely useless. The Sanitary Engineer considers a masonry reservoir between the filter beds and the engine house essential. He suggests one 30'x20'x[illegible]', 2' below mean water level of the filters. This would be capable of holding 45,000 gallons of water, or 12 hours output of the filter beds.

he present estimate.

5. These improvements only effect the permanent and will in no way effect the temporary supply. I am commencing preparatory work in anticipation of sanction.

I have the honour to be,

Sir,

Your most obedient servant,

Superintendent.

NOTE BY THE CHIEF ENGINEER, P.W.D.

No..1040.A. Wks-1/A/24 dated ..30th..May 1924.

xxxxxx

The Alipuram Jail has been receiving supplies from the Fort Ditch, Bellary, which is fed by a long tortuous earthen channel taking off from a sluice in the Alipuram Tank. A long unprotected channel of this nature being considered to be far from satisfactory, not only from a sanitary point of view but also on account of the great losses from seepage and evaporation, it is now proposed to pump water direct from the tank through 6" pipes to a storage reservoir in the Alipuram Jail wherefrom it will be supplied to various parts of the Jail through distribution pipes. The above scheme was roughly estimated by the Superintendent to cost Rs.86,000 . At the request of the Jail Department the Executive Engineer, Bellary Division drew up plans and estimates for a more elaborate scheme than that submitted by the Jail Superintendent although the main principles in both the schemes are the same, the difference being that the Superintendent's scheme provided for pumping direct from the tank to the Jewel Filters while the Executive Engineer's scheme provides for gravitation flow through sand filters and then pumping from a sump. The estimate prepared by the Executive Engineer, Bellary Division made provision for the following additional works and the total cost of the scheme came to Rs.1,14,000/-.

(1) Filter beds sand.

(2) Engine house.

(3) Overhead tanks.

The Sanitary Engineer to Government inspected the water supply scheme and suggested that a masonry reservoir (4) between the filter beds and the engine house was essential.

2. The Inspector General of Prisons now forwards for sanction an estimate amounting to Rs.1,21,000 for the Alipuram Water Supply Scheme making also therein provision for the work suggested by the Sanitary Engineer.

3. The scheme as finally drawn up consists of the following works:-

(1)	Pipes, engines, pumps, etc., including fittings...	Rs.87,000
(2)	Constructing an engine house and store room ...	Rs. 5,350
(3)	Constructing filter beds	Rs.15,000
(4)	Constructing a service reservoir ...	Rs. 5,625
(5)	Constructing a water tank over kitchen in Alipuram Jail	Rs. 4,600
(6)	Unforeseen works. ...	Rs. 2,275
	Total	Rs.1,21,000

4. The estimate has been scrutinised by the Chief Engineer and the points requiring remarks are dealt with below:-

Water tank over kitchen. A detailed plan of the existing kitchen has not been furnished to see if the existing walls are capable of carrying the additional load due to the tank. The Superintending Engineer should satisfy himself about the strength of the existing walls before constructing the tan on them.

Engine house and store room. A plan of the engine house etc. has not been forwarded to check the details in the estimate. A plan for the same should be prepared and the Superintending Engineer's approval thereto obtained before the work is put in hand.

5. With the foregoing remarks the estimate amounting to Rs.1,21,000 is recommended for sanction.

The scheme for the improvement of water supply to the Alipuram Jail was submitted originally by the Superintendent to cost Rs 86,000/. Funds for the purpose has already been provided by Finance but the estimate has not yet been sanctioned by P.WD. The Supdt now reports that a more elaborate scheme has since been drawn up by the Executive Engineer costing Rs 1,14,000 and that the scheme is complete and comprehensive and much sounder than his original proposals. The D.G. of Prisons also supports the adoption of the latter scheme and anticipates a reduction in cost by Rs 20000 by employment of convict labour. The scheme now put forward was foreshadowed in the Superintendents progress report of the work for the week ending 21st July 1924 and Finance Department's approval for the adoption of the comprehensive scheme, though costlier, has already been sought in this Dept vide No. 1265C-1 & 22.2.24.

Law (8(1) Dept

Ct 1330 From the Supdt. Alipuram Jail No. 474

& 22. 2. 24

The Supdt. Alipuram Jail has now forwarded for sanction the revised estimate for the Alipuram water supply scheme prepared by the Executive Engineer. The estimate is now obtained amount to Rs 1,21,000. In his letter No. J. 432 & 22.2.24 forwarded with DG's letter No. G 17: 22.2.24 it was stated that the Executive Engineer's scheme would cost only Rs 1,14,000 and that a saving in the cost amounting to Rs 10000 was expected by employing convict labour which the DG was prepared to put through at Rs 20000. It will be seen from the above that there is a variation in the cost of the revised scheme as now put forward and as anticipated by the DG and the Supdt of Alipuram Jail and the difference amounts to Rs 7000. Upon taking action on the present proposals it is submitted it is necessary to obtain the views of the DG as to whether he considers the scheme costing Rs 12,000 necessary for the Alipuram

Water Supply to Alipuram Jail Ref - 6 P.W.D

Cr. 646 MG/A. From the Supdt Alipuram Jail, Bella
No 623/J of 12.3.24

Law (Genl)

Seen. Let us have full particula
about final estimate in due course
For perusal to P.W.D.

(Sd) R.R.R.
14.3.24.

P.W.D

HS

Submitted

2. The estimate for the Jail supply
scheme has not been received in thi
office through the I.G. of Prisons.

3. Attention is invited to para 3 of
of the Supdt's letter. The file may
perhaps be sent to I for remarks
if any.

16/3/24

14.3.24

17/3/24

T

after perusal of

D.W

The pump house referred to in para 3 of the Supdt's letter is often
meant for the collecting well. The collecting well is now
constructed about 20 ft. outside the Engine House. The position
of the Engine & plan is outside may be approved.
The letter bearing para 3 will be examined as re

of the plan from the S. G. of Ris.

with reference to para 4 of the Deputy's letter it is submitted that a masonry reservoir (food water tank) between the filter beds of the Kanpur House might be constructed as suggested by the Sani. Engr.

PR/20/3/24

PR 20/3/24

US

This may now be returned to Law (Genl) with the request that arrangements may be made to expedite the submission of the detailed estimate and plan for the work

LAW GENERAL O!
Dwdy. No 646 Al/24-1
21-3-24

As

The original estimate for the Alipuram water supply scheme cost Rs Rs 86 048 and necessary provision for it was sanctioned by Finance in G.O. R 53 dt 7.2.24. The original estimates have not yet been sanctioned by PWD apparently because revision of the estimates were in contemplation

f^ III Cr of GO at Q (no PWD)

[No estimate was received by Chief Engr before 8-5-24]

2. The Supdg Alipuram Agent reported in his letter No. J/432 dt 19.2.24 that the Executive Engineer was sending forward a more elaborate scheme. The scheme as revised entailed a cost of Rs 1,14,000, the main points of differ were that the latter allowed for

f^ 2 Cr

3 filter beds and
1 Engine house
2 Overhead tanks

This scheme again was scrutinised by the Sanitary Engineer. He has added a reservoir between the filter beds and the Engine house. The cost has therefore been further raised to Rs 1,21,000. The detailed Estimate which the Dy. Chief also approved are kept below. They may be sent to PWD for scrutiny and sanction

f^ 1.8 Cr

f^ 10-11 Cr

3. As regards funds it is not clear

Alipuram Jail — Water Supply Scheme. (Note on pp. 2-3 ante)

FC 1641 Ext.B
7.6.24

Work in Progress

	Lakhs	
(1) Amount of the rough estimate proposed by the Supdt. of the Jail.	86	CE's note on p. 12 ante
(2) Amount of the detailed estimate prepared by the Executive Engr.	1·14	
(3) Amount of the detailed estimate now under consideration [Proposed by the Sanitary Engineer & sanctioned by the Chief Engr.]	1·21	

The increase in the amount of the 2nd estimate over that of the 1st is due to the fact that the Jail Supdt's Scheme provided for pumping direct from the tank to the filters while the E.E's Scheme provides for gravitation flow through sand filters & then pumping from a sump. The further increase in the amount of the 3rd estimate is due to the addition, at the suggestion of the Sanitary Engineer, of a masonry reservoir between the filter beds & the engine house. Submitted that

the estimate for ₹ 1·21 lakhs may be accepted. It is presumed that there will be savings in this estimate to the extent of Rs. 20,000 by using convict labour – please see D.I.G's letter dy 22.2.24 on page 1 C.F. A sentence to this effect may, it is submitted be added to the draft

A

since omitted on para 4 of the P.W.D. draft vide 18/6.

2. Funds An allotment of Rs. 86,048 was sanctioned for this work in 1923-24. It is not known how much of this amount was actually spent in 1923-24 & how much will be required in the current year. On the 24th April 1924, the D.I.G. of Prisons stated that the amount required in the current year would be intimated 'shortly.'

p. 11 ante & 6/678 Law (Gl.) 28.2.24 (G)

para. 2 on p. 11 C.F

Provision has not been made for this work in the current year's budget & Finance have already noted that the expenditure in the current year should be met by reappropriation from the provision under "41. Civil Works – Transfer

para 2 on p. 2-3 ante

The P.W.D propose to consider the question of funds after the receipt of intimation from the D.I.G of Prisons. The P.W.D & the Law (Gl.) Deptt. may be requested

para. 2 on p. 10 ante & para 3 of draft.

to take up at once the question of allotting funds as it is presumed that expenditure is being incurred on the work in anticipation of allotment of funds

para 5 on p. 9 C.F.

20537

K

If the proposals are accepted, the balance available will be about Rs 20,000 and may be allotted by Finance for this work for the present. The D. G. of Prisons may be asked to come up for more funds, after the present allotment is spent. When further Surrender are received, they will be placed at the disposal of Finance who may then allot for the balance of requirement. With the above information the file may be sent ~~to Law (Legal) for necessary action~~ to Finance for perusal prior to circulation
